

# *NATKHAAT WING*

FOR THE MONTH OF OCTOBER-NOVEMBER 2022

# *Class 3-Fraction activity*

Fraction activity with the help of flags of the different countries. Fractions help children understand the nature of numbers and their interactions, they tell you what portion of a whole you need, have, or want. So writing the fraction of the colours in the flags of different countries help the students to have the awareness of which flag belongs to which country.

# Class 3-Fraction activity

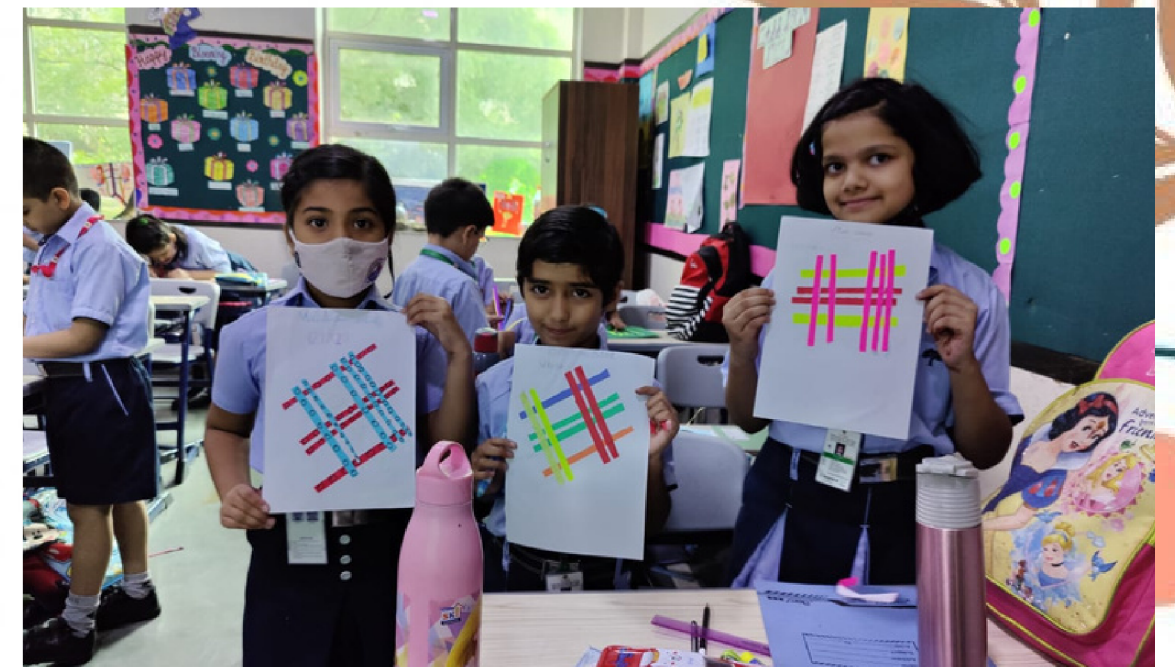

# *Class 3- Japanese Multiplication activity*

Japanese way of multiplication. The method is also known as Indian Multiplication and Chinese Stick Multiplication. It helps the students to evaluate which method is most appropriate for a given problem. This method becomes very efficient when dealing with small numbers.

# *Class 3- Japanese Multiplication activity*

## *Class 3- Photo frame activity*

This can help enhance their imaginative skills. With this activity ideas for kids, we would be able to help them be productive and creative at the same time.

# *Class 3- Photo frame activity*

# *Class 3- Elephant activity (Hindi)*

पाठ-9 महागिरि

उद्देश्य-

\*विद्यार्थियों का पाठ के प्रति रुचि उत्पन्न करवाना।

\*विद्यार्थियों को हाथी के पपेट के माध्यम से कहानी समझने में आसानी होगी। इस प्रकार पढ़ाए गए पाठ की व्याख्या वह पपेट के माध्यम से भी कर सकेंगे।

विषय-

पाठ में हाथी को परोपकारी और दयालु दर्शाया गया है। विद्यार्थियों को इस पाठ से यह शिक्षा मिलेगी कि हमें हमेशा दूसरों की मदद के लिए तैयार रहना चाहिए और सभी के साथ प्रेम से रहना चाहिए।

# Class 3- Elephant activity (Hindi)

# Class 3-Munshi Premchand activity - Round 2

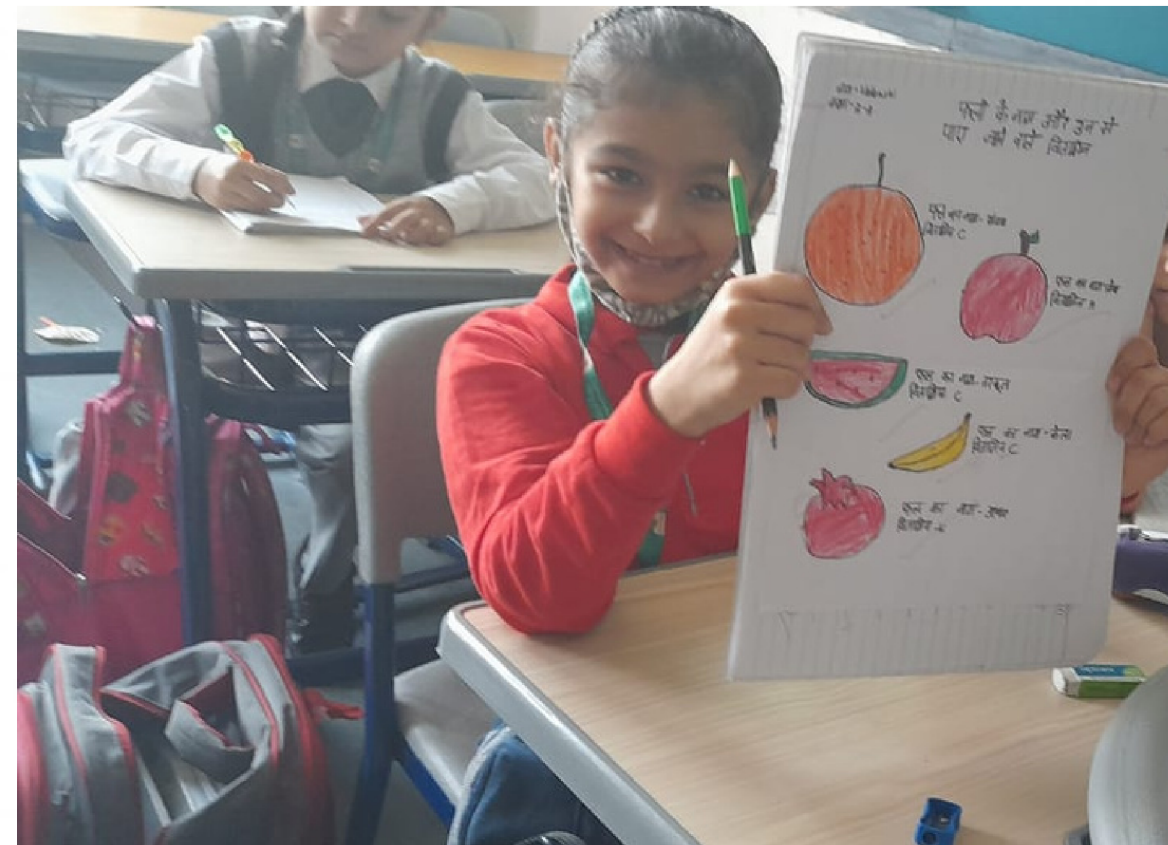

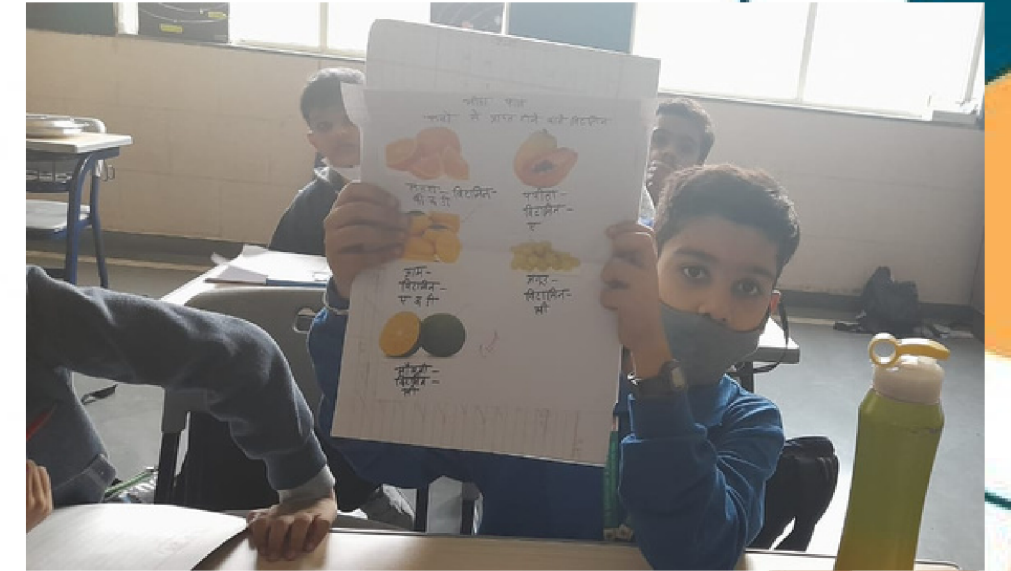

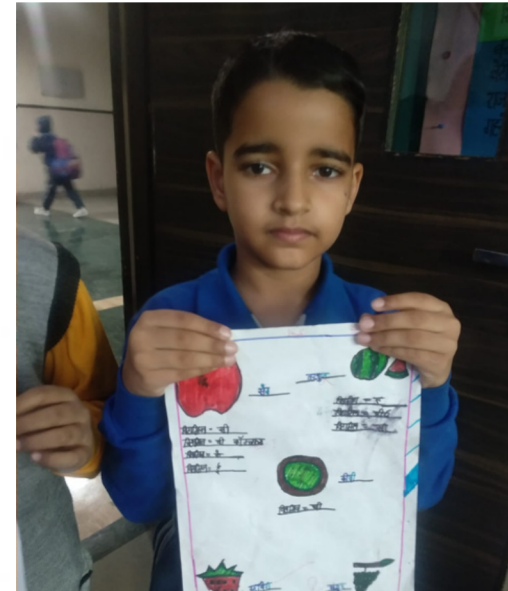

# *Class 3-Fruit activity*

फलों से प्राप्त होने वाले पौष्टिक तत्वों की जानकारी और मौसम के अनुकूल फल खाने का महत्व बच्चे समझ सकेंगे।

# Class 3-Fruit activity

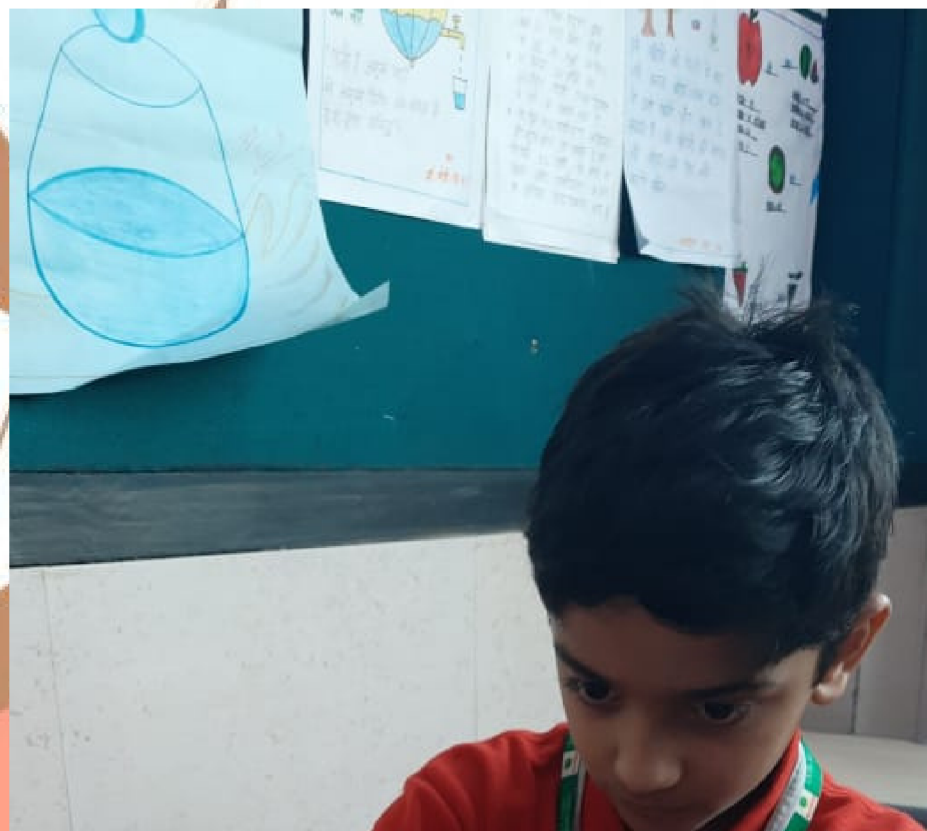

# *Class 3-Science Activity*

Without plants, life would not be sustained on earth. People depend upon plants to satisfy their basic human needs such as food, clothing, shelter, and medicine. Students of class III prepared very interesting 3 D model of tree. The students confidently explained their models in the class by showing the different uses of plants, that brought a lot of cheer and applause.

## *Class 4-English activity*

No words can describe a mother, No words exist to express mother's love, No words can match a mother's sacrifice, No words can explain a mother's selfless deeds, No word to replace the word mother... There is no better way to describe the love of the mother than to describe her through some adjectives. With this, students of class IV had done hands-on activity.

# Class 4-English activity

# *Class 4- Math's activity*

## Identifying the number (prime or composite)

Introduction to prime and composite numbers through sports activity. Students will be able to find factor pairs for whole numbers and determine if they're prime or composite numbers through sports activity as it's includes physical fitness ,skills mental alertness and understanding of concept in a fun way.

# *Class 4- Math's activity*

## *Class 4- Science Activity*

A simple test for starch performed at a lab can allow students to understand the type of carbohydrates and their foods contain. The presence of starch can be determined by using Iodine solution. Students of class IV were taken to chemistry lab, they conducted the experiment in the presence science teacher Ms. Geeta Devlal. The students confidently explained and conducted the experiment that brought a lot of cheer and applause.

# Class 4- Science Activity

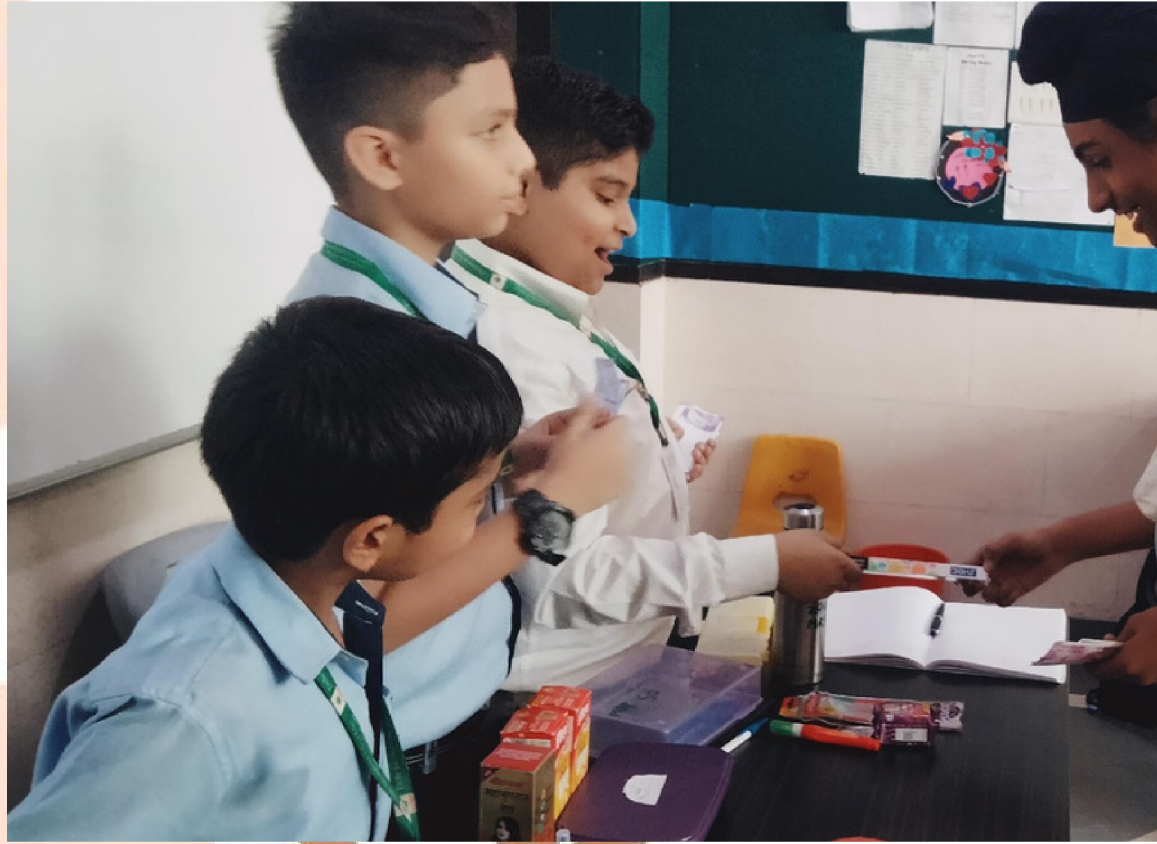

# *Class 5- Math's Activity - FUN WITH FINANCE*

Activity starts with a shopping act where students learn about profit/loss, investment etc. Students were buying and selling household materials in their play shop. It helps students to understand the value of money, concept clarity and develops student's money management skills.

It also develops student's thinking, numeracy and social skills.

# Class 5- Math's Activity

# *Class 5-Science Activity*

With a little planning, thought, and creativity, you can significantly reduce your impact on the environment (and likely your wallet!) by cutting down on trash.

With this school of thought Students of Class V learnt the parts of the skeleton by engaging in hands-on activity. They made an edible skeleton using foxnuts, popcorns, their favorite veggies and candies. This activity helped them visualize the parts and overall construction of a human skeleton.

# Class 5-Science Activity

# *Space activities Class 3*

Learning about the wonders and complexities of space can open up the minds of students and push them towards greater horizons. Students don't need to be rocket scientists to learn some of the fundamentals of engineering. They can learn the mysteries and facts about space through a variety of fun activities conducted in class and labs.
