## **“Cyber Safety” Video For Parents**

### **Say No to Cyberbullying, Think before you post, Share or Comment**

Dear Parents,

In this Digital world, where children are increasingly wired to social media and the internet, the concern of cyber security, cyber bullying, and cyber hygiene are pertinent. Parents too need to be well-informed of what steps they can take to keep their children safe.

As our lives have become increasingly dependent on technology, virtually all personal and business data is kept on internet-connected platforms, which can become a gold mine for bad actors. The “Cyber Challenges and Security” will highlight best security practices and focus on general cyber hygiene to keep your information safe.

*We attended a webinar on Cyber Security which we found to be very relevant for day to day computer usage by all of us.*

This video will help you to learn & enhance both personal & professional Cyber Security Practices and **stay safer online to become more cyber resilient, Secure, Improving Cyber Security posture for all.**

*We are sharing the Webinar’s Video with you and recommend that you watch it to get some pragmatic solutions, recommendations for the future and anecdotes from highly effective mentors and educators.*

**Please Click on the link below to watch the video:**

<https://youtu.be/mVKviVHHRE0>

I am happy to share the useful resources with my family and will look forward to your inputs and comments.

Wishing you all a safe and conscious digital footprint.

Warm Regards,

*Anubha Srivastava*
